Jorge R. Piquer
Senior Front-End Developer

piquerjr@gmail.com | github.com/FlGrown | jorgepiquer.com | linkedin.com/in/jorgepiquer

Summary

Senior front-end developer with 10+ years building accessible, high-performance web apps in React and TypeScript. Led the rebuild of a healthcare Prior Authorization tool into a revenue-generating SaaS product. Experienced in WCAG accessibility, testing (Jest, Playwright), mentoring, plus modern AI workflow integration using Claude and GitHub Copilot.

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, SASS
Frameworks & State: React, Redux, Redux Toolkit, React Query
Testing: Jest, Playwright
Cloud & Data: AWS (Lambda, S3, CloudWatch), PostgreSQL
Accessibility: WCAG, Section 508, ADA compliance
Tools & Practices: Git, Figma, Scrum, Component Libraries
AI-Assisted Development: GitHub Copilot, Claude, AI-assisted refactoring, adversarial code/QA review

Experience

Judi Health, New York, NY (remote) March 2021 - Present

Senior Front-End Software Developer II

- Lead front-end development for a new medical claims adjudication platform, architecting complex multi-step claim flows and mentoring junior developers.
- Led the redesign and rebuild of the Prior Authorization tool, turning an internal utility into a revenue-generating SaaS product; added Medicare and medical PA case handling and reworked the UI based on internal user feedback.
- Migrated state management from Redux to React Query, cutting API calls by 20% through caching.
- Use GitHub Copilot and Claude for development, refactoring, and rotating adversarial QA reviews as part of Judi Health's AI-first engineering practice.
- Own the customer-facing products as part of a Scrum team: company website, iOS/Android member app, and the Advantage discount prescription site and app.
- Maintained the shared component library used by all teams and led its accessibility (WCAG) update.
- Write Playwright regression tests and Jest unit tests covering 90% of key UI flows.
- Provide production support: fix bugs, resolve data issues, and monitor Lambda errors in CloudWatch.

Finalsite, Inc., Glastonbury, CT (remote) July 2016 - March 2021

Front-End Developer

- Build out client sites based on approved designs and project scope
    - Fully responsive and cross browser compatibility
    - SEO-optimized and ADA compliant
- Create custom, reusable components within proprietary CMS
- Write up documentation and instructions on each build for non-technical users

Thinkful, New York City, NY June 2019 – October 2020

Web Development Mentor

- Provide professional and technical guidance to web development students
- Meet weekly with assigned students to answer questions and clarify points on web dev topics such as: HTML, CSS, responsive design, accessibility, JavaScript, React, Node and MongoDB
- Provide feedback and code reviews on capstones

State of Maryland, Department of Human Resources, Baltimore, MD October 2014 – July 2016

Webmaster I

- Redesign of public and intranet site
- Requirements gathering from individual divisions
- Work with Graphics Team to create mockups and wireframes
- Ensure compliance with Section 508 standards
